## LOS GATOS

### THIS WEEK

The median single family home price in LOS GATOS this week is \$1,250,000. The 199 homes have been on the market for an average of 177 days.

Inventory has been lightening lately and the Market Action Index has been trending up. These are mildly positive indications for the market.

### QUARTILES

To get a tightly targeted understanding of homes in the market, we break each locale into quartiles. Each quartile is 25% of the homes listed.

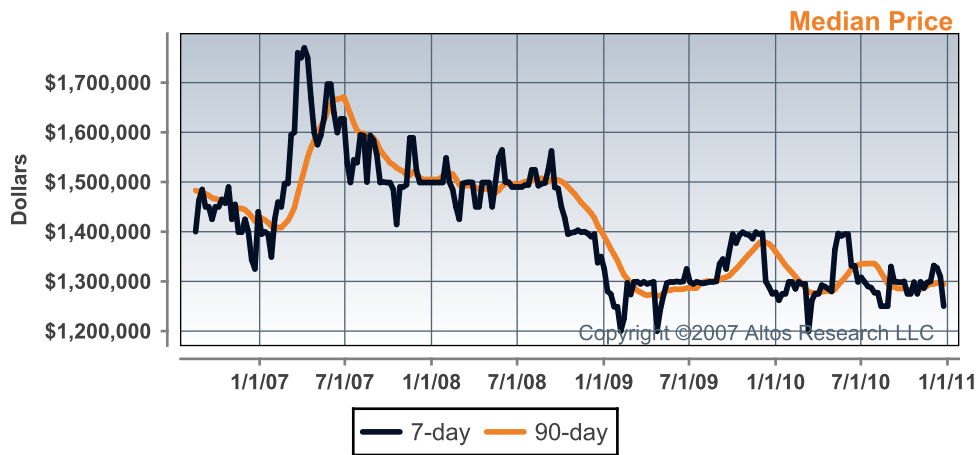

Most expensive 25% of homes

Upper-middle 25% of homes

Lower-middle 25% of homes

Least expensive 25% of homes

We'll refer to the quartiles in the trend graphs below.

### PRICE

Again this week we see a downward notch for prices. Pricing has been weak in recent weeks and versus their absolute-high levels. The Market Action Index is a good leading indicator for the durability of this trend.

### QUARTILE PRICES

Often, we find insights by watching pricing trends within the quartile segments. Prices have been mixed-to-negative trends in recent weeks. Quartile 4 is down, while the rest of the market is basically flat. Look to the Market Action Index to determine if this plateau is the stage for a prolonged price decline.

## PRICE AND VALUE

The market plateau is seen across the price and value. The price per square foot and median list price have both been reasonably stagnant. Watch the Market Action Index for persistent changes as a leading indicator before the market moves from these levels.

## INVENTORY

Inventory has been falling in recent weeks. Note that declining inventory alone does not signal a strengthening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is changing with the available supply.

Residential house prices are a function of supply and demand, and market conditions can be characterized by analyzing those factors. Watch this index for sustained changes: if the index falls into the Buyer's Market zone for a long period, prices are likely in for a downward correction.

The Market Action Index (MAI) illustrates the balance between supply and demand using a statistical function of the current rate of sale versus current inventory.

An MAI value greater than 30 typically indicates a "Seller's Market" (a.k.a. "Hot Market") because demand is high enough to quickly gobble up available supply. A hot market will typically cause prices to rise. MAI values below 30 indicate a "Buyer's Market" (a.k.a. "Cold Market") where the inventory of already-listed homes is sufficient to last several months at the current rate of sales. A cold market will typically cause prices to fall.

## MARKET ACTION INDEX

The LOS GATOS market is currently quite strongly in the Buyer's Market zone (below 30). The 90-day Market Action Index stands at 16. With several months of inventory available at the current sales rate, buyers should find ample choice.

Home sales have been exceeding new inventory for several weeks. Since this is a Buyer's market prices are not yet moving higher as excess inventory is consumed. However, as the supply and demand trends continue, the market moves into the Seller's zone, and we are likely to see upward pressure on pricing.

The quartiles can help you answer the question, "How hot is the market for homes in my price range?"

## MARKET ACTION QUARTILES

Not surprisingly given the overall Market Action Index, all quartiles are in the Buyer's Market zone with several months of inventory given the current rate of demand for homes in the quartile. Watch the quartile for changes before the overall market shifts. Often one end of the market (e.g. the low end) will improve and signal a strengthening market before the whole group changes.

### DAYS ON MARKET (DOM)

The properties have been on the market for an average of 177 days. Half of the listings have come newly on the market in the past 119 or so days.

### DOM PER QUARTILE

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.

## THIS WEEK

The median single family home price in LOS GATOS 95030 this week is \$1,689,400.

Inventory has been lightening lately and the Market Action Index has been trending up. These are mildly positive indications for the market.

## PRICE

Prices in this zip code have been on a downward trend recently and this week, while essentially flat, doesn't break us out of that cycle.

### PRICE PER QUARTILE

In the quartile market segments, we see prices in this zip code have settled at a price plateau across the board. Prices in all four quartiles are basically mixed. Look for a persistent shift (up or down) in the Market Action Index before prices move from these current levels.

### Characteristics per Quartile

Quart	Median Price	Med. Sqft	Med. Lot Size	Bed	Bath	Med. Age	Inven.	New	Ab-sorbed	Avg. DoM

### QUARTILES

Most expensive 25% of homes  
 Upper-middle 25% of homes  
 Lower-middle 25% of homes  
 Least expensive 25% of homes

### PRICE AND VALUE

Despite recently falling prices, the price per square foot has stayed reasonably flat. This implies that there's a portion of the market being priced at a premium. You can investigate this condition in the quartile details.

## INVENTORY

Inventory has been falling in recent weeks with 42 properties available this week. Note that declining inventory alone does not signal a strengthening market. Look to the Market Action Index to gauge whether buyer interest is falling with the available supply.

## MARKET ACTION INDEX

The LOS GATOS 95030 is quite strongly in the Buyer's Market zone. The 90-day Market Action Index stands at 15. With several months of inventory available at the current sales rate, buyers should find ample choice.

## MARKET ACTION QUARTILES

Not surprisingly, all quartiles are in the Buyer's Market zone with several months of inventory given the current levels of demand. Watch the quartiles for changes before the overall market shifts.

**DAYS ON MARKET**

The properties have been on the market for an average of 170 days. Half of the listings have come newly on the market in the past 115 or so days. Watch the 90-day DOM trend for signals of a changing market.

**DAYS ON MARKET**

It is not uncommon for the higher priced homes in an area (Quartiles 1 and 2) to take longer to sell than those in the lower quartiles.
